

- Show (via 2 screenshots) the size of both containers on Docker Hub by clicking on "Tags".

hw3large

Hw3small

- On your local Ubuntu VM, delete all containers and container images using `docker ps`, `docker stop`, `docker rm`, and `docker rmi`. Then, use `docker run` to instantiate each of your container images on Docker Hub and ensure it maps the Ubuntu VM's port 8000 to the container's port 5000. Show the console output displaying the container image layers being pulled. Perform a `wget` to your container (e.g. `http://localhost:8000`) and show that it returns your landing page.

hw3large

```
codd@coddb-VirtualBox:~/cs356-w21-branden-codd-940428984/hw3$ docker run -p 8000:5000 --name large -di codd/hw3large
